

# Point-of-Care Devices

Homecare Homebase™ continues to expand its choices of available point-of-care devices to include the latest handheld devices, laptops, slates and tablets, resulting in the most comprehensive list of hardware options available and ensuring a fully automated solution that's right for you. Whichever your agency's device preference, whether a laptop or one of the growing number of portable devices running on the Android® or mobile Windows® platforms, you'll get everything you'd expect from Homecare Homebase.

## With Homecare Homebase truly mobile point-of-care:

- Field staff are confident they always have the most up-to-date information on their patients.
- You're ensured fast wireless data transfer, syncing visits back to the office in as little as two minutes. That's less time than it takes the caregiver to drive to the next appointment.
- Caregivers have an intuitive, user-friendly interface that offers everything they need for a successful home visit.
- Everyone benefits from streamlined coordination of care, reducing the paperwork shuffle and eliminating staff time spent completing or correcting documentation. Information comes in right the first time, every time!

Both handheld and laptop solutions employ the same level of wireless connectivity that makes Homecare Homebase the leader in speed, accuracy and mobility. Now you're free to choose the mix of equipment that best complements both the desire to retain quality staff and the need to control your capital outlay. You'll see the increase in productivity and job satisfaction that comes with Homecare Homebase no matter which hardware solution mix you use.

Mobile as ever. Smart as ever. And now, as customizable as ever. See the currently certified devices on the following pages.
