

Knowledge Link™

Make the most of your agency's data with Knowledge Link, one of the optional Homecare Connections™ available to extend your system's capabilities. Knowledge Link is actually two tools in one – The Agency Dashboard and the Business Analyzer. Agency Dashboard gives you a quick, real-time look at more than 100 critical agency metrics through highly interactive, user-friendly charts. Agencies can model even the most sophisticated metrics for the most informed strategic business decisions.

You can even use it to model the latest proposed reimbursement changes, identifying the impact of cuts on your agency in time to make adjustments, giving you more clarity and confidence to prepare for the future. That's powerful information.

If the Agency Dashboard is the face of Knowledge Link, the Business Analyzer is its heart. Here, your transactional data flow into multidimensional comparisons that involve your complete operation. It's the only tool of its kind, giving you richer insights and enabling more strategic business decisions. Of course, it's all customizable to ensure you can easily measure the key performance indicators of greatest relevance to your operation. And because Knowledge Link data refreshes daily, your view is never more than 24 hours old.

Knowledge Link:

- Extends the reporting capabilities of the standard Homecare Homebase system.
- Generates multidimensional analyses for a precise understanding of your agency's financial and operational health.
- Provides timely access to the data in your Homecare Homebase database. You can compare such measures as episodes, length of stay and revenue by dimensions including branch, service line, caregiver and referral source.
- Lets you rollover any data measure to spotlight key information, then click it to drill down.
- Requires an average of just one and a half days to train thanks to its intuitive interface driven by the latest in data warehouse technology.
