

Provider Link

Improve your agency's compliance while building relationships with referral sources using Provider Link, one of the optional Homecare Connections™ available to extend your system's capabilities. This secure web portal gives physicians and their staff individually protected access to real-time information about the patients they've referred to your agency. Physicians can approve or decline orders from their computer with their secure electronic signature. Even more important, they can request alerts to changes in a patient's condition on a patient-by-patient or visit-by-visit basis. And the web interface is so intuitive, little or no training is required. All that's needed is an

Internet connection and a user name-password combination. Because each log-in is specific to an individual or custom-defined network of physicians, the Homecare Homebase system is able to track activity and the corresponding billing code number for the physician's convenience in his or her own billing process. Facilities and discharge administrators benefit as well, gaining a secure conduit for quickly and easily sending new patients your way.

Provider Link:

- Allows physicians to view their patients' vital stats and charts, schedules, diagnoses, medications, open and approved orders, wound histories and outcomes.
- Provides physicians a graphical tool to view a patient's entire episode of care with complete details of the patient's progress.
- Gives physicians control over the types of alerts they wish to receive regarding changes to patients' status.
- Can accommodate custom-defined networks to allow access to a patient's data by any physician within the network for round-the-clock care.
- Includes a built-in billing report summary identifying eligible claims and showing what can be billed by the corresponding billing code number.
- Creates a secure and confidential HIPAA-compliant environment that is so simple to use, even web-wary users can see its utility.
- Improves your agency's compliance by making it easy for physicians to certify and recertify homebound status and care.
