

A solution built for Hospice.

Less paperwork. Better quality of life. The best in patient care.

homecare  **homebase™**

A solution developed by people like you

A woman with dark hair, wearing blue scrubs, is smiling and talking on a black telephone. The background is slightly blurred, showing what appears to be a medical or office setting.

Very few businesses operate like a hospice agency, where compassionate care ranks above virtually every other priority. Yet regulatory complexities and rising costs can't be ignored. We get it. That's why the Homecare Homebase™ automation solution is so practical. Every tool grew out of real-world experience. Homecare Homebase combines real-time technology and comprehensive management tools to benefit not only your agency's financial health, but also every member of your team. More important, the valuable resources that were once consumed by redundant and mundane tasks are now available for caring for your patients and their families.

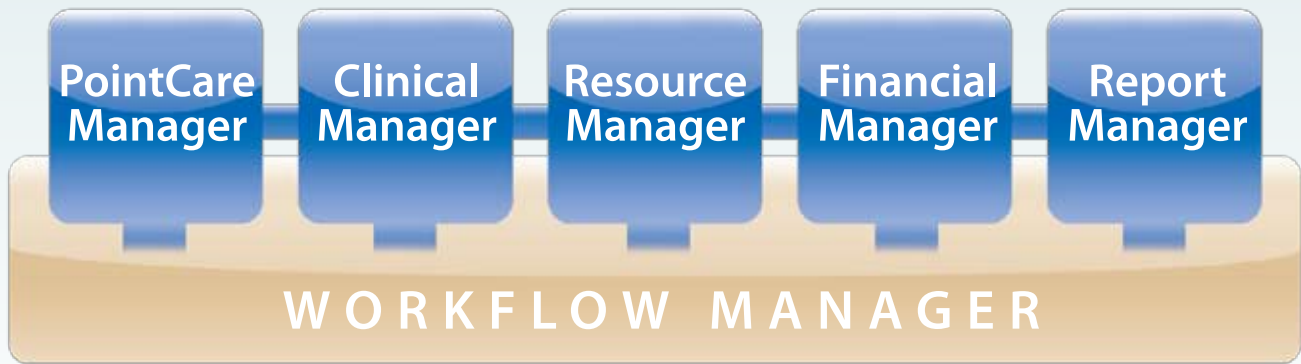

Synchronize and share clinical data in real time

Caregivers carry an easy-to-use point-of-care device that lets them access the EMR for each patient. They'll also see any alerts and notes from on-call visits that may have occurred overnight, without a trip to the office for paperwork. Patients get the attention of an informed, empowered caregiver who can then complete 90% of the visit documentation right in the home. Your office receives the visit data via wireless Internet connectivity using our proprietary compression technology. Two minutes later, everyone in the patient's circle of care can access accurate, complete information. No other hospice automation system comes close to offering such rapid, real-time synchronization and sharing.

Single-source support for your clinical, operational and financial success

Imagine a system of managers delivering hospice-specific, intuitive tools to every part of your agency, from intake to bereavement processes and everything in between, including scheduling, billing, QAPI, outcomes and cap management, and on and on. Now imagine these managers working together seamlessly as one integrated whole. And further, that every aspect of the solution can be customized to suit your preferred processes. That's the Homecare Homebase advantage.

The Homecare Homebase™ Solution

Homecare Homebase provides your agency with a system of interrelated managers designed to improve patient care, streamline your agency's day-to-day operation and boost your profitability.

PointCare Manager simplifies visit data input, reducing the chances of something being overlooked. Patient data can be synchronized in less time than it takes a caregiver to drive to the next home visit.

Clinical Manager brings in visit data for back-office verification and submission, eliminating redundant data entry. Years of firsthand experience and industry best practices informed the development of its operational processes and clinical pathways.

Workflow Manager drives your entire agency's operational process. Details no longer fall through the cracks or get lost in a sea of paper, while daily tasks get completed in minutes rather than hours.

Resource Manager matches patient needs to the skills and scheduling needs of field staff, boosting your ability to recruit and retain top-choice staff while benefiting your patients.

Financial Manager uses real-time information collected from your field and office staff to allow bills to be dropped within 24 hours of an initial visit. Your cash flow improves in the first 30 days.

Report Manager delivers the real-time insights you need for timely action in every area from clinical and financial performance, to resource allocation and referral development.

Additional tools can extend your capabilities

Homecare Homebase offers a number of optional tools to give you more precise control over a particular aspect of your business. We call them **Homecare Connections™**, designed to integrate effortlessly with your Homecare Homebase solution.

- **Knowledge Link™** creates multidimensional comparisons of every aspect of your business operations for smarter strategic decisions.
- **Referral Source Link** tracks referrals for stronger relationships.
- **Provider Link** builds a secure physician's web portal for improved communication.
- **Family Link** provides concerned loved ones an online forum for information exchange with your agency's caregivers as well as family members.
- **Partner Link** creates a secure portal to share information with suppliers, regulatory agencies, payroll providers and more.

Secure and always up to date

Of course, Homecare Homebase meets all current requirements for Centers for Medicare and Medicaid Services (CMS) as well as HIPAA. And because we maintain the software, servers and databases, we can update your entire Homecare Homebase solution as requirements change, with no interference to your daily activities. We have extensive disaster preparedness plans to keep your data secure, accessible and compliant with all regulatory guidelines. Internet transmissions are fully encrypted. All you need to run Homecare Homebase are point-of-care devices in the field and computers in the office, equipped for high-speed Internet access.

See real, bottom-line benefits in no time

Much as we might wish it otherwise, compassion alone won't keep your agency's doors open. That's why you'll be glad to know that within 18 months of implementation, the Homecare Homebase solution can bring a return on investment in excess of 200%, based on average returns. Our customers report an immediate improvement in their daily operations after putting us to work. We can easily set up an ROI analysis for you during our initial consultation.

Integrating people, processes and data via your customized solution

Talk to any Homecare Homebase customer and odds are you'll hear stories of better compliance, smoother scheduling, increased referrals and reduced claims rejection. What you might be surprised to hear is how even those "less than tech-savvy" caregivers, patients and their families come to advocate for the Homecare Homebase solution, citing better on-call experiences, fewer delays in getting needed services and supplies, and an overall sense that their voices are heard and respected. It's true. We get it. And we'd love to share our solution with you.
